

AKASH PRIYADARSHI

Self-Taught Developer • AI-Augmented Engineer

Patna, Bihar, India | ydv.akash2006@gmail.com | github.com/AkashPriyadarshii | akashpriyadarshi.vercel.app | LinkedIn

PROFESSIONAL SUMMARY

Self-taught developer and AI-augmented engineer from Patna, India. Builds complete products end-to-end alone: systems tooling in Rust, five shipped agent CLIs with 94 combined GitHub stars (the TypeSafe Jev ecosystem), Android apps with on-device Rust cores, and deployed products on Vercel and Cloudflare Pages.

TECHNICAL SKILLS

Core Languages: Rust, Zig, Go, TypeScript, Python, Kotlin, Dart
Working Languages: Java, Swift, Shell, PowerShell, PL/pgSQL, SQL
Systems & Architecture: CLI Tooling, Cross-Platform Builds, Token Optimization, Model Context Protocol (MCP) Stdio Servers
Mobile Engineering: Android SDK, Kotlin Coroutines, Jetpack Compose, Flutter, Drift / SQLite, TDLib Native JNI/FFI
Full-Stack & Cloud: Next.js, React, Tailwind CSS, PostgreSQL, Supabase, Docker, GitHub Actions CI/CD, Vercel
AI-Augmented Tooling: Claude Code, MCP Server Architecture, Prompt Engineering, Autonomous Workflow Design

PROJECTS

- rustygrep: Token-Efficient Grep for LLM Coding Agents** [GitHub] Rust • CLI • MCP
- Built on ripgrep's core crates with a dedicated `--llm` mode that compresses matched output to save LLM context-window tokens.
 - stdio Model Context Protocol (MCP) server for direct agent tool calling; ~1,350 LOC, 6 test suites, Criterion benchmarks, published crate, green CI.
- kharcha: India-First UPI Expense Tracker** [GitHub] Kotlin • Rust
- Android app auto-capturing UPI payments from SMS and notifications (amount, merchant, reference) with an on-device Rust core (0.18 ms parse).
 - Offline-first storage with no cloud dependency, built for Indian UPI users.
- tdlib-android: Precompiled TDLib Distribution for Android** [GitHub] Kotlin • C++
- GitHub Actions matrix compiling Telegram TDLib native C++ libraries for all 4 Android ABIs (arm64-v8a, armeabi-v7a, x86, x86_64).
 - Ships prebuilt AARs via GitHub Releases and Maven Central (io.github.tdlib-android): 2,000+ combined downloads, consumed as an Android Gradle dependency with Kotlin Coroutines/Flow wrappers.
- TypeSafe Jev Ecosystem: Five Agent CLIs and Frameworks** [GitHub] Rust
- Five shipped tools for AI coding agents: agent-first SEO and GEO CLI with MCP server (jev-seo), synthetic dataset sifter streaming Parquet/JSONL (jev-curate), sub-second git pre-commit and pre-push reflex gate (jev-git), zero-hallucination repo and crate scout (jev-scout), systematic agent development framework (jev-superpowers).
 - 94 combined GitHub stars across the five repositories.
- My-Starred-Repos: Auto-Updating Curated Repository Dashboard** [GitHub] Python • PWA • Actions
- Dashboard categorizing 813 curated starred repos across AI agents, systems, and LLM tooling, refreshed daily via GitHub Actions.
 - Live PWA: my-starred-repos.vercel.app

EDUCATION & LANGUAGES

Class 12 (CBSE): Hellens School (2026) **Class 10 (CBSE):** KV Jawaharnagar (2024) **Languages:** English (Professional), Hindi (Native)
